

Architectural Seals

IS4010, IS4015, IS4020 & IS4025 Threshold Plates

A low profile threshold plate used in conjunction with door bottom seals to help prevent rain, draught and smoke infiltration.

IS4015

Installation Instructions

1. Remove seals from packaging and measure to full width between jambs or door stops.
2. Cut to size using machine tool/hacksaw (where threshold plate meets jamb or stop, sealant may be applied to prevent water leakage).
3. Drill and countersink threshold plate to suit fixing screws supplied.
4. Position plate on door sill in required location and screw fix using screws supplied.
