

LORIENT Door Edge Protector Fixing Specification

1. Remove existing doors and take off all ironmongery, door plates, intumescent fire/smoke seals.
2. Reduce the damaged door edge, or edges, to suit the **edge protector**.
3. Position the **edge protector** and mark all locks, keeps, shoot bolts etc. and cut these out with a hand held router.
4. Secure the **edge protector** to the door core using countersunk screws.
5. Refit all ironmongery and insert the intumescent fire/smoke seals in the rebate.
6. Rehang the doors.
