FINGER GUARD SEALS

FSR 5000

FACE-FIXED

A durable roller-type safety finger protector designed to prevent fingers becoming trapped on the non-hinge (cavity side) of single swing doors.

The tensioned roller mechanism maintains constant gasket pressure, creating a protective barrier between the door leaf and frame as the door opens and closes. The aluminium housing features adjustable fixing positions for accurate alignment during installation. The hard-wearing synthetic fibre gasket is fire retardant (B1 classified). Suitable for timber, metal, PVC and glass doors.
